A photograph showing a close-up view of a metal bridge railing. The railing is made of galvanized steel and features a series of vertical posts connected by horizontal rails. The railing is situated over a body of water, which is visible in the background. The water is dark and still, with some small, yellowish leaves floating on its surface. The railing appears to be part of a larger structure, possibly a bridge or a walkway. The date stamp "10/02/2020" is located in the bottom right corner of the image.
