10/02/2020

A photograph showing a corner of a concrete structure. The concrete is light-colored and shows signs of weathering and staining. A metal plate or beam is attached to the wall, and there is significant rust and peeling paint on the surface above it. The date 10/02/2020 is printed in orange at the bottom right.

10/02/2020

A photograph showing a close-up of a concrete wall. On the left, a horizontal metal beam is heavily rusted. The concrete wall is light-colored with visible vertical and diagonal cracks. The upper right portion of the wall is covered in a dense layer of green moss or algae. In the bottom right corner, there is an orange date stamp.
