

A photograph showing a concrete bridge or overpass structure. A thick, light-colored rope hangs vertically from a central point on the bridge's edge. The bridge is made of weathered concrete with visible joints. Lush green trees and foliage are visible in the foreground and background, partially obscuring the bridge. The sky is bright blue with some white clouds. The date '08/26/2020' is printed in orange text at the bottom center of the image.
